FULLER'S NURSERY

THE HARDINESS of a plant is easily identified with a general google search. Texas hardiness zones will be the only zones relevant to Fuller's Nursery plants contained in this Fuller's Nursery plant guide...

"FULL SUN" EXPOSURE recommendations reflect the USDA's and other agricultural and horticultural experts' opinions on certain plants. We recommend, however, throughout draught and hot summer months, watering and offering some spotted shade even to plants to thrive in full sun. Texas heat indexes and direct sun exposure has been known to burn even the most heat hardy plants.

All photos were either used by permission or part of public domain. This compilation is the property of Fuller's Nursery and Fuller's Operations, LLC.
